

Introduction

Grit is a powerful personality trait that reflects an individual's enduring commitment to long-term goals and their ability to maintain consistent effort over time. Grounded in the influential research of psychologist Angela Duckworth, grit is recognized as a key driver of achievement and success — often more critical than talent or intelligence alone.

This assessment defines grit as a combination of seven core personality traits that together reflect a person's capacity for sustained passion and perseverance. As Duckworth (2016) highlights, grit is what enables individuals to overcome obstacles, stay focused through setbacks, and continue striving toward meaningful outcomes. In today's world, where persistence can be just as important as skill, grit is essential for long-term personal and professional growth.

How to read this report

When reviewing your assessment report, keep in mind that it provides feedback on your performance in specific scenarios and does not define your entire behaviour or character. The report highlights your strengths and areas on each of the skills for improvement, which can help you understand your abilities and develop further.

Summary

Score ranges (%)	Level	Score Interpretation
0 - 40	Low	May frequently change goals or lose motivation when things get tough. Likely to prefer short-term rewards over long-term effort.
41 - 70	Medium	Generally able to stick with goals, though setbacks or distractions can cause delays or loss of focus. Shows potential to build greater grit.
71 - 100	High	Displays strong determination and long-term focus. Unlikely to give up easily and tends to pursue goals with consistent effort over time.

Descriptors

1. Self Awareness: 85%

Understands their strengths and weaknesses, seeks feedback, and adjusts their behavior to improve relationships and performance. Recognizes the impact of their emotions on work and others.

Recommendation

- Consider for leadership roles where emotional intelligence supports decision-making.
- Is highly likely to thrive in roles requiring strong interpersonal skills and collaboration.
- Has the capability to excel in positions that demand self-correction and accountability.

Tip

Assign leadership in feedback-driven projects. Use as peer mentors for team development. Place in roles requiring strong self-regulation.

2. Growth Mindset: 65%

Willing to learn and improve but may be hesitant to step out of their comfort zone. Accepts feedback but does not always act on it.

Recommendation

- May be suited for roles that provide gradual skill-building and development opportunities.
- Could strengthen learning agility through structured coaching and goal-setting.
- Is likely to benefit from exposure to stretch assignments with guided support.

Tip

Provide gradual stretch assignments. Use structured career roadmaps. Offer hands-on learning opportunities.

3. Perseverance: 65%

Tries to stay committed but may become discouraged when faced with repeated failures or major setbacks. Needs motivation to push through difficult situations.

Recommendation

- May perform well in structured environments with clear goals and milestone tracking.
- Could improve resilience with exposure to progressively challenging tasks.
- Is likely to benefit from coaching on managing setbacks and staying focused under pressure.

Tip

Set structured short-term milestones. Implement resilience training. Assign progressive challenge-based tasks.

4. Discipline: 70%

Generally responsible and organized but occasionally struggles with distractions or procrastination. May need external motivation to stay on track.

Recommendation

- May be effective in roles with structured workflows and external accountability.
- Could enhance self-management skills with goal-setting and prioritization support.
- Is likely to benefit from performance-tracking tools to strengthen consistency.

Tip

Offer task-prioritization training. Use structured planning tools. Implement performance tracking systems.

5. Commitment: 75%

Fully dedicated to goals, follows through on responsibilities, and remains engaged over time. Does not abandon tasks or switch priorities without reason.

Recommendation

- Consider for retention-critical roles requiring long-term dedication.
- May be positioned for strategic initiatives that demand sustained follow-through.
- Has the capability to contribute to culture-building efforts focused on organizational loyalty.

Tip

Place in retention-critical roles. Assign long-term strategic projects. Involve in engagement-building initiatives.

6. Adaptability: 55%

Can adapt to change but may take time to adjust. Prefers routine but is willing to make changes when necessary.

Recommendation

- May adjust well to change with sufficient preparation and structured transition plans.
- Could strengthen flexibility through exposure to dynamic projects with guidance.

- *Is likely to benefit from training on navigating uncertainty and change management.*

Tip

Introduce exposure-based learning. Use rotational roles to increase flexibility. Provide guided transition support.

7. Achievement Orientation: 35%

Works toward goals but may not consistently push for excellence. Prefers achievable targets and avoids overly ambitious objectives.

Recommendation

- *May be effective in goal-driven environments with structured motivation systems.*
- *Could benefit from performance coaching to encourage higher ambition and goal-setting.*
- *Is likely to improve through exposure to results-oriented teams and incremental challenges.*

Tip

Use goal-based incentives. Introduce peer motivation programs. Expose to high-performance teams.

Disclaimer

This report is based on the self-assessment responses provided by the individual. The results should be viewed as a general reference and should not be the sole basis for making important decisions. It is advisable to use this report alongside other sources of information and consider seeking further evaluation from a qualified professional if needed.

Furthermore

Please be aware that while these results offer some insights into skills and abilities, they should be considered in conjunction with other relevant factors like work experience, education, and personal traits. Additionally, no assessment can guarantee with 100% certainty how an individual will perform in a specific role or work environment.
